

Please leave the WI no call laws alone. State laws should be stricter than Federal laws. This puts government closer to the people it serves. It also allows for differences in areas. State control is easier to change with societies and technological changes. More Local control is what America is built on. Federal laws should be for those areas not easily controled at a more local level. No call laws don't meet this requirement. WI no call laws are working fine and highly supported by WI residents. The area code system allows easy identification for telemarketers to the different requirements due to various state laws. Please keep the limited family time we have these days free from the unwanted intrusion of telemarketers.
